

Stephanie Sun: Hey Lee Chong Wei, have you heard about the upcoming CSR event in our neighborhood? The "Cybersecurity Awareness Seminar: Protecting Our Digital Lives" on October 10th?

Lee Chong Wei: Oh, yes! I've seen the posters around. It's going to be held at the community center, right?

Stephanie: That's right! I'm quite excited about it. It's such an important topic these days.

Lee: Absolutely. With everything going digital, cybersecurity is something everyone needs to be aware of. And did you hear about the speaker for the seminar?

Stephanie: Yes, I did. I heard he's been selected to take up the role of Deputy Minister of Cybersecurity. Quite an impressive feat!

Lee: That's amazing. It's great that someone so accomplished is taking the time to educate us. But there's more to it – his son is quite the prodigy too.

Stephanie: Really? What's the story there?

Lee: His son is currently in Secondary 3 at Catholic High School. He's the chairman of the ION CCA and recently won the Youth AI Engineer 2024 award conducted by IMDA.

Stephanie: Wow, that's impressive! It sounds like talent and intelligence run in the family. It's so inspiring to see young people achieving so much at such a young age.

Lee: Definitely. It makes you feel proud to be part of this community, doesn't it? We have such amazing people living right here in Havelock.

Stephanie: Absolutely. It also motivates us to learn and grow. I'm really looking forward to the seminar now. It'll be a fantastic opportunity to learn from someone with such expertise and experience.

Lee: Same here. I think it'll be beneficial for everyone, especially with all the cyber threats nowadays. It's good to know how to protect ourselves and our families.

Stephanie: Yes, and it's wonderful to see the community coming together for such a meaningful event. I hope to see you there!

Lee: You bet. Let's make sure to spread the word so more people can benefit from it.

Stephanie: Agreed. See you at the seminar, Lee!

Lee: See you, Stephanie!
